SPIRAL CLEARER ROLLER

ADVANTAGES

- Effective cleaning gives better yarn quality.
- More cleaning efficiency than the conventional clearer rollers.
- Working improvements gives lesser autoconer clearer cuts.
- Simple Cleaning Process.
- Zero Maintenance.

FOR RING FRAMES:

Available for RIETER, ZINSER, LMW, KTTM, TOYODA, MARZOLI, SUESSEN and all type of Ring frames and Doubling Machines.

FOR COMBERS:

Available for RIETER-E7/4, E7/5, E7/6, LK250, LK54, LK64, E60, E60H, E62, E65, CHERRY HARA, TOYODA and LMW combers.

Lattice Aprons for Compact Spinning_____SAKTHI

LATTICE APRONS

ADVANTAGES

Lattice Apron is most important part in Compact Spinning, it is the only part in-contact with the material processed.

- Fibre Compacting has to be done through Uniform Suction with the help of Uniform Fabric as well as Uniform Mesh/cm.
- The Apron Material has to be anti-static.
- It has to dissipate the Static Electricity which is produced during running over the metallic surface Mango tube and dead weight.
- Apron material has to be self-lubricant to run smoothly and reduce the friction.

WE HAVE TWO TYPES OF APRON:

- White by Gold ----- N-STAT
 - Black by Black ----- LUBE-STAT
- Apron Life - Upto * months it depends upon the Count Processed, Speed & Humidity Conditions.

COMPARE WITH COMPETITOR APRON:

- Our Apron Having Uniform Fabric Quality with Uniform Mesh/cm. We can achieve better compacting.
- Our Raw Materials (Gold/Black) can able to dissipate the Static Electricity.
- Our Raw Materials are Self Lubricant and friction is less and it will smoothly.

APRON SIZE

36.5 x 25 mm
39.4 x 17 mm
45.6 x 20 mm
43.5 x 18 mm
37.5 x 22 mm
37.5 x 25 mm
39.4 x 25 mm
41.5 x 18 mm
52.7 x 18 mm

COMPACT SYSTEM

For Suessen
For Toyota - 1 (RX 240)
For Toyota - 2 (RX 300)
For Pinter
For RIFA Chinese Compact
For Dechang Compact
For H - FANG Compact
For LMW New Version
For LMW Compact
